I have 2 adapters in my pc one is [LANpro LP-N24U] and the other is [D-Link DWL-G122]. I want to configure each and their respective links individually. which is easier? I am really confused here. I want to know what should I do and how to configure my Laptop and PC. Please help me out. 4. Jan 26, 2013 - The problem is that the adapter that I am using was working perfectly until my laptop started to hang up whenever it passes a certain point. Then I tried taking out the adapter and disconnecting the power of my laptop. After that, the adapter installed the driver and worked perfectly, and then I reconnected and it still worked. this is a very strange problem that I have been having with both my USB and PCI adapters. 2.
