I think this is the best mahjong game on Steam. It has very calming music which doesn't distract, decent graphics as well as effects and enough stages to choose from.. This is a fun game if you like Mahjong solitaire it has a good beginner level and harder levels for more advanced players you can play offline and is good Mahjong fun. My only recommendation is that you play on pc.. It is a good mahjong game with all required features and looks really cool too.. Lovely game. It opened easily, I was able to click on the choices for type of game, the LARGE SIZE game came up for me and I played it four times in four different configurations. All of those times, the tiles were easy to see and work with. The background music was pleasant, and (joy of joys) there was no timer on the game counting down and not letting me finish. I really liked that.. doesn't work anymore, since windows 10 updated. a bit perturbed.... I like this version of the game. I like the way it starts with easy (beginner) levels and lets you work your way up. The game runs smooth, is easy to navigate, and I like the sound effects. It is also easy to pick up at the level you left off at.. goof off on here with my daughter. she loves this game a lot so considering it was so cheap I can't complain

There is no option menu, so you cant mute sounds, which is music so innoying. And there is some perspeticve problems accurs i think.

. This is a relaxing game with fills its purpose perfectly. Along with the decent pricetag it makes up for a nice little puzzlegame. Recommended.
