Amazing atmosphere Amazing music Amazing characters Amazing gameplay Amazing graphics Amazing price Amazing game.
Impossible to play. FPS drops after 1 minute playing.. Good game overall.. way worse than the sequel, but fun. Maybe
Momodora isn't on your radar, but it should be. It's one of the best metroidvanias (silly word) out there. So, as the title says, this
is the third installment, but one and two are nowhere to be found on Steam. They can, however, be found itch.io for free (with

an optional donation). I'd personally recommend playing them all since they're great games. The first is a bit more linear, not really metroidvania in that there's no map or backtracking, still a very good game. The second improves upon the first in most areas (from what I can recall). So what about the third? Well, it's a bit of a mixed bag, to be honest. While some things are better, I feel rdein (the creator) didn't go all the way for whatever reasons. Still, this is a good game with all the trademarks of a Momodora title; beautiful pixel graphics, great animation, an awesome soundtrack, melancholy story and so, damn, hard. It might not be for everyone, but at this price, it's hard to go wrong. It's a bit light in the story department and that seems to be the downfall of every title. Shame, since they've created such a great world with so much room for lore. What could be a massively expansive experience falls short. And continuity isn't even on the table. It's not a perfect game, but it's a good game. Well worth your money.. Good game overall.. Amazing atmosphere Amazing music Amazing characters Amazing gameplay Amazing graphics Amazing price Amazing game. way worse than the sequel, but fun

V1.007 Update : - Added a file music browser ! Feedback welcome. At the moment it doesn't save your last folder position. Will be adding this later.. Workshop and Ship Editor Video Tutorial : Here's a video tutorial on how to create a ship using the new ship editor.. V1.006 Update : - Added graphic settings to the options screen. Please let me know if they help improve framerate on slower machines.. V1.049 - New OST music track! : - Added a new awesome music track from Johnny Frizz: Signal Disruption. - This has been added to the OST DLC also.. V1.024 : - Reduced visual intensity for 50% settings - Added code to help Linux county code. Beat Hazard 2 - Dev Blog #14 - Party mode : New Beat Hazard 2 dev blog. This time I take a tour through the new Multiplayer Party Mode and have a quick look at music generated player ships.. V1.033 : - Fixed dethroned email notifications (Please re-enter your email in settings->notification to get these) - Detected Open Mic tracks now appear in your music browser (Denoted using Microphone icon) - Can now access leader boards for played Open Mic tracks this way - New Cobra missile boss turret - New Unguided rocket boss turret - New Split Beam boss turret Note: 4 new ships currently being tested. If you want to try them, swap to the 'testing' branch under DLCs and use the password 'okletsdothis' Please give feedback on the forum/discord server.. V1.036 : - Fix for open mic line-in problems. - Open mic mode will now start automatically if you used it last time. - Fixed missing button prompt in music browser when using gamepad.
