Unable to play because can't grab robot to start the game especially when the starting panel is outside my playing space.. I love mechs so I was hoping for this to be great. The combat was probably always going to be my least enjoyed part. Unfortunatley I couldn't pass the defence portion of the tutorial. It would accept my hands were in front of my face.. I ahve a 2mx2m playspace and even then I still couldn't reach the robot in the beginning, as soon as they fix this i'll recommend it but for now I can't.
